

CONSISTENT TEMPERATURES. CONSISTENTLY EFFICIENT OPERATION.

SOLID TECHNOLOGY MAKES YOUR DECISION EVEN EASIER.

Ducane[™] takes the guesswork out of heating and air conditioning. The equipment we make is built with quality materials, and based on reliable, time-tested designs that optimize performance and energy efficiency. When you go with Ducane, it's the right choice every time.

SOME DECISIONS ARE TOUGH. THIS ONE ISN'T.

When you consider Ducane systems, quality and value are givens. You're getting peace of mind with great features and smart designs that squeeze more efficiency out of every energy dollar. And best of all, you get it right now.

A Constant Torque motor delivers consistent, efficient performance.

The Constant Torque motor inside the Ducane 95G2E provides even, consistent airflow, which contributes to steadier temperatures. But the benefits don't end there. It also uses about half the energy of a traditional PSC motor, helping make the 95G2E ENERGY STAR[®] qualified. The 95G2E may also qualify for federal, state and utility incentives, so you can see savings right away.

Over the years, a hardworking Ducane furnace can save you hundreds of dollars on utility bills.

Savings vary depending on use, geography, lifestyle, maintenance, installation and other factors. Chart depicts 5-year savings over less-efficient models.

Two-stage heating delivers superior warmth.

Conventional furnaces can only operate at one speed regardless of heating need. But the 95G2E furnace can operate at two different levels of heat output, allowing it to efficiently match the heating demands in your home.

THE FULL-FEATURED DUCANE[™] 95G2E IS THE RIGHT CHOICE, RIGHT NOW.

- 95% AFUE* means 95% of your fuel is turned into usable heat, for savings all winter long
- 10-year limited warranty on parts and a limited lifetime warranty on the heat exchanger (with registration)** mean comfort with lasting peace of mind
- Constant Torque motor maintains steady airflow for more even temperatures, while using around half of the energy of a conventional blower motor
- Two-stage gas valve adjusts fuel usage based on heating demand to optimize energy usage
- Robust aluminized steel heat exchanger is crimped, not welded, for long life and safety
- ENERGY STAR[®] qualification means efficient operation all year and the added incentive of possible federal, state and utility tax breaks

*Like the miles-per-gallon rating on your automobile, the higher the AFUE rating, the lower your fuel costs. All furnaces manufactured today must meet at least 78% AFUE. If your furnace is 10–15 years old, it probably falls below the current minimum and wastes energy. **Applies to residential applications only. For terms, conditions and exclusions, see full warranty at alliedair.com.

MAKE THE DUCANE DECISION FOR IMMEDIATE RELIEF AND LONG-LASTING COMFORT.

When you think about everything Ducane delivers, your decision is no decision at all. Don't wait to get comfortable. The performance and reliability you want are right here, and ready to go to work. **Ducane. It's the right choice. Right now.**
